DYNA-MITE

75MT Parnelli "Kawasaki" Jones DYNA-MITE

Great for the beginner - Great on the trail - Great for camping trips!

- Automatic clutch-free shifting
- 75 cc engine
- 3-speed gearbox
- 40 mph top speed
- Telescopic front fork—shocks on rear
- Folding handlebars—fits in trunk of car

RUGGED 75cc ENGINE

The heart of the Dyna-Mite is a single-cylinder 75cc engine. Precision engineered with the same care as all Kawasaki's. Easy starting with motorcycle type kickstarter. Enough low-end torque to take you where you want to go in the rough country . . . and a high gear that lets you cruise along at up to 40 mph. SUPERLUBE takes care of engine oiling.

EASY TO RIDE WITH AUTOMATIC CLUTCH-FREE SHIFTING

The Dyna-Mite is designed for anyone to ride. Ideal for teaching the kids to ride and just right for trailing. Also, if there is a pint-sized racer in your family, this little super mini is just the machine for him to ride like the big boys do.

DEPENDABLE 3-SPEED GEARBOX

The 3-speed transmission and automatic centrifugal clutch make the Dyna-Mite a real ball to ride. The clutch-free shifting feature is a big help to the beginner as well as on the trail.

COMPACT AND LIGHTWEIGHT

It's lightweight (only 121 lbs) and folding handlebars make the Dyna-Mite compact enough to fit in the trunk of your car. You can take it anywhere with you — just right for camping trips and family outings.

EXCEPTIONAL RIDING COMFORT

Suspension at both front and rear, and a big sturdy but soft seat provide an exceptionally comfortable ride. The pipe is up-swept and tucked-in for maximum ground clearance. Spark arrestor and special high-traction tires.

*The laser-blend, diamond hard finish will take a lot of punishment and keep your Dyna-Mite looking like new for years.

SPECIFICATIONS

PERFORMANCE

Maximum speed 40 mph

ENGINE

Type Two-cycle, single cylinder
 Displacement 73 cc (4.45 cu in.)
 Bore and stroke 1.81 x 1.75 in.
 Compression ratio 6.7:1
